

FALL 2007
CS 113: Introduction to Computers
Assignment 5
Due: October 11, 2007
Sub Procedures I
(16 points)

Objectives: Learn how to use Sub Procedures.

What to do?

Read section 4.1 of the textbook.

Write a program that displays the word WOW vertically in a picture box in large letters as shown below, once the command button is clicked.

Each large letter should be drawn in a Sub procedure. For instance, here's the Sub procedure for drawing the letter W:

```
Private Sub DrawW()  
    picWow.Print "  **          ***"  
    picWow.Print "  **          ***"  
    picWow.Print "  ** **      ***"  
    picWow.Print "  ** ** ** ** **"  
    picWow.Print "  **          ***"  
    picWow.Print  
End Sub
```

The VB program's interface should look as shown above. Make sure the objects in your program are as follows:

Object	Property	Setting
frmLab5	Caption	Wow
cmdDrawWow	Caption	Print WOW!
picWow		

Save your work.

What to submit

Use Blackboard Vista to submit the Visual Basic Form File with your program.
